

Requirements for project descriptions

”Forskerservice Klassisk”

When you apply for data extractions via ”Forskerservice klassisk” [Hanne: ”Classic research support” where you receive an extract as opposed to working on an SDS server] you need to attach a comprehensive project description.

A project description should contain the following headlines:

- **Introduction**

Brief introduction to the field of research with information on existing literature /knowledge on the topic.

- **Purpose**

Briefly phrase one or more objectives.

- **The project’s research question**

The exact research question(s). Preferably worded as the actual question(s) that would be answered by the conclusions from the project.

- **Data and Method**

Which data do you wish to use and by which methods will they be analyzed? In this section one may mention the statistical analyses to be used.

- **Statement of ethical considerations**

- **Perspectives / anticipated impact**

What will be the contributions of this project?

Based on document at <http://sundhedsdatastyrelsen.dk/da/forskerservice/forskerservice-klassisk/adgang-fsk/ansoegningsproces-fsk> (300616)
